## PROFESSIONAL SUMMARY

Mobile developer with three years of experience in building high-performing, scalable, and user-friendly mobile applications using Flutter. Passionate about continuous learning and staying up-to-date with the latest technologies. I am seeking opportunities to contribute my expertise within a dynamic team, eager to tackle new challenges and foster both personal and professional growth. I have a proven track record of delivering quality apps, solving complex problems, and enhancing existing applications for better performance and user experience.

## WORK EXPERIENCE

**Founder & Mobile App Developer**                                                    **August 2024 – present**
**Bushraa**
- Designed and launched "Bushraa" – a full-featured cross-platform mobile app offering dream interpretation, with secure in-app messaging, expert selection, and online payments.
- Led end-to-end development using Flutter and Firebase, ensuring high performance, smooth UX, and seamless integration of real-time chat, IAP, and content management tools.

**Junior Flutter Developer**                                                    **March 2024 – January 2025**
**Alkashier** – Remotely
- Developed and enhanced cross-platform mobile applications: Implemented new features, optimized app performance, and ensured high-quality standards throughout the entire app development lifecycle
- Collaborated with teams: Worked with peers to improve user experience, address technical issues, and contribute to the continuous improvement of applications at Alkashier.

**Freelance Flutter Developer**                                                    **August 2022 – October 2024**
**Mostaql** & **Upwork** – Freelancer
- Built user-friendly and high-performing apps on Mostaql: Developed applications that achieved significant user engagement, including one app reaching 20k downloads.
- Maintained a 100% project completion rate and a 5-star average client rating: Demonstrated a strong commitment to quality and client satisfaction through timely delivery and excellent performance

## EDUCATION

**Cairo University** – Giza, Egypt                                                    **September 2022 – May 2024**
Academic Diploma 2 Years in Computer Science, Faculty of Graduate Studies and Statistical Research

**Ain Shams University** – Cairo, Egypt                                                    **September 2018 – May 2022**
Bachelor degree in Commerce English section

## PROJECTS

**بشرى**
A trusted dream interpretation platform connecting users with expert Dream Interpreters. It offers direct consultations, instant interpretations, and educational content, ensuring accurate and private insights based on Islamic principles.
Google-Play-User-App | App-Store-User-App | Google-Play-Interpreter-App | App-Store-Interpreter-App

**Haykl**
A construction-focused mobile app that simplifies the building process by offering tailored solutions for finishing, contracting, and construction accessories. It also provides turnkey project delivery and direct communication with contracting companies.
Google-Play | App-Store

**BimoKook**
E-commerce app connected with an ERP system, featuring advanced functionality such as multiple units per product (e.g., single item or carton), with prices and discounts varying by unit. The app also includes standard features found in any e-commerce app, such as: Online payment. Order tracking and Push notifications.
Google-Play | App-Store

**Mahart Tafl**
An app designed to help parents and speech therapists improve children's speech and pronunciation through a conversational speaking program. Contributed to resolving payment gateway issues and sound functionality, while enhancing overall app performance and stability.
Google-Play | App-Store

**Azkar**
A mobile app that helps users maintain their daily Azkar by offering a complete collection of morning and evening remembrances, a digital Tasbeeh, Qibla direction, and personalized prayer reminders – all within a simple and intuitive interface.
Google-Play | App-Store

**Ratbli & Ratbli B2B**
A service booking app tailored for events like birthdays and employee celebrations. A separate B2B Flavor is available exclusively for companies. Key features include: Online payment and digital wallet. Discount codes. Pickup location selection. Order tracking and notifications.
Google-Play Ratbli | App-Store Ratbli | Google-Play B2B | App-Store B2B

**Ihjezly (Users App)**
A hotel booking app similar to Booking.com, allowing users to browse properties and book accommodations with ease. The app offers: Advanced filtering for specific property types, locations, and availability. Online payment and Reservation tracking, cancellations, and reviews.
Google-Play

**Ihjezly (Property Owners)**
The counterpart to Ihjezly for Users, this app is designed for property owners to list and manage their accommodations, such as hotels, furnished apartments, resorts, private apartments, and event halls. Features include: A complete advertising system to promote their units. Digital wallet for managing ads or adding new listings. Unit management tools for availability and occupancy tracking.
Google-Play

**Almufasir**
High-performance and top-rated mobile app with 20,000+ downloads, empowering users to record dreams through in-app purchases, access dream interpretations from experts, and explore a comprehensive dream book.
Google-Play | App-Store | Behance

**Kyan**
Real estate mobile app, akin to OLX, enabling sellers to list properties while providing seamless buying and selling experiences through advanced search and filtering for houses, apartments, villas, and more.
Google-Play | Behance

## PACKAGES

**Flutter Dynamic Routing Package:**
A Flutter package designed to facilitate **dynamic routing** based on **user actions** and preferences. It provides an intuitive and flexible solution to manage navigation within Flutter apps, allowing developers to handle complex navigation flows easily without hardcoding routes. Ideal for apps requiring advanced user-driven navigation.
